Cohen & Steers REIT and Preferred and Income Fund, Inc. (NYSE: RNP) (the “Fund”), acting in accordance with an exemptive order received from the Securities and Exchange Commission and with approval of its Board of Directors, adopted a managed distribution policy under which the Fund intends to include long-term capital gains, where applicable, as part of the regular monthly cash distributions to its shareholders. This policy will give the Fund greater flexibility to realize long-term capital gains and to distribute those gains on a regular monthly basis.

You should not draw any conclusions about the Fund’s investment performance from the amount of this distribution or from the terms of the Fund’s managed distribution policy. The Fund estimates that it has distributed more than its income and capital gains; therefore, a portion of your distribution may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund’s investment performance and should not be confused with ‘yield’ or ‘income’. The amounts and sources of distributions reported in this Notice are only estimates, are likely to change over time, and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for accounting and tax reporting purposes will depend upon the Fund’s investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The amounts and sources of distributions year-to-date may be subject to additional adjustments.

Shareholders should take note of the relationship between the Year-to-date Cumulative Total Return with the Fund’s Cumulative Distribution Rate for 2025. In addition, the Fund’s Average Annual Total Return for the five-year period ending August 31, 2025 is set forth below. Shareholders should note the relationship between the Average Annual Total Return with the Fund’s Current Annualized Distribution Rate for 2025. The Fund’s NAV is calculated as the total market value of all the securities and other assets held by the Fund minus the total liabilities, divided by the total number of shares outstanding. While NAV performance may be indicative of the Fund’s investment performance, it does not measure the value of a shareholder’s individual investment in the Fund. The value of a shareholder’s investment in the Fund is determined by the Fund’s market price, which is based on the supply and demand for the Fund’s shares in the open market.
