Consistent with our disclosure in the Prospectus regarding our NAV calculation, our investments in real estate are initially valued at cost. Set forth below are the weighted averages of the key assumptions in the discounted cash flow methodology used in the September 30, 2025 valuation of our investments in real estate not valued at cost.

Property Type	Discount Rate		Exit Capitalization Rate	
Community shopping center		8.02 %		6.95 %
Grocery-anchored shopping center		8.25 %		6.88 %

These assumptions are determined by our independent valuation advisor and reviewed by the Advisor. A change in these assumptions would impact the calculation of the value of our investments in real estate. For example, assuming all other factors remain unchanged, the changes listed below would result in the following effects on our investments in real estate value:

Input	Hypothetical Change	Community Shopping Center Values	Grocery-Anchored Shopping Center Values
Discount Rate	0.25% decrease	1.62 %	1.94 %
(weighted average)	0.25% increase	(1.62)%	(1.70)%
